Help for beginner, limited-resource, and socially disadvantaged farmers

The 2008 Farm Bill continues to address the unique circumstances and concerns of farmers who are beginning (farming fewer than 10 years), have limited resources, or who are socially disadvantaged because they belong to racial or ethnic groups that have historically been subjected to prejudice. It provides for voluntary participation, offers incentives, and focuses on equity in accessing USDA programs and services.

Increased equity under the 2008 Farm Bill:

- Five percent of available Environmental Quality Incentives Program (EQIP) funds and Conservation Stewardship Program (CSP) acres will be set aside to assist beginning farmers and another five percent to assist socially disadvantaged farmers.
- Increased payments for the costs associated with planning and implementing conservation measures may be available for socially disadvantaged and beginning farmers.
- Up to 30 percent of such payments may be provided in advance for purchasing materials or contracting.

NRCS and conservation districts: partners in conservation

The USDA Natural Resources Conservation Service is a federal agency that helps people help the land through scientifically based, locally led voluntary conservation efforts.

NRCS works in partnership with New Hampshire's ten conservation districts, which help identify and address natural resource concerns in local communities, and coordinate public and private resources to meet local needs on a grassroots level.

A conservation district is a division of state government established under state law to conserve and wisely manage resources and partner with state and federal agencies to deliver programs, education and technical assistance to their communities. Visit www.nhacd.org to locate your conservation district and to learn more.

USDA is an equal opportunity employer and provider.

Is this land your land? You need a conservation plan.

A Guide to the 2008 Farm Bill Conservation Programs in New Hampshire

If you own or manage farmland or forest land, run a greenhouse, grow specialty crops, or farm organically in New Hampshire, then the 2008 Farm Bill conservation programs can help you address natural resource concerns and opportunities on your land. Sign-up is open and continuous for all conservation programs.

You will need a plan - a conservation plan, conservation activity plan (CAP), or a forest management plan - to identify the resource concerns and conservation practices needed to meet your conservation and environmental objectives. Contact your local NRCS field office for help in developing a plan (financial assistance is available to pay for developing some plans) and to apply for financial assistance to implement your conservation practices.

What is a conservation plan?

Developing a conservation plan is the first step in working with NRCS and applying for most USDA conservation programs.

A conservation plan provides a roadmap to sustaining or improving production while managing the natural resource base that supports your operation.

Conservation planning identifies objectives, resource limitations and opportunities, and evaluates alternatives to help you make decisions in managing your operation.

What is the 2008 Farm Bill?

The Food, Conservation, and Energy Act of 2008 – also known as the 2008 Farm Bill – contains new conservation provisions that simplify existing federal programs while maintaining the conservation-based emphasis developed during the preceding two farm bills.

National priorities remain similar to the 2002 Farm Bill. These priorities include reducing non-point source pollution, soil erosion and emissions; conservation of ground and surface water; and protection of at-risk species. New Hampshire continues to offer innovative practices for agricultural, forestry,

greenhouse and organic producers.

Additional assistance is available for new, limited resource and socially disadvantaged farmers (see back page).

Program Priorities in New Hampshire

- Water quality & conservation
- Sustainable forest management
- Soil quality & Integrated Pest Management (IPM)
- Wildlife habitat enhancement
- Wetland restoration
- Conservation easements
- Invasive species control

2008 Farm Bill Conservation Programs

- Conservation Technical Assistance (CTA)
- Agricultural Management Assistance (AMA)
- Conservation Stewardship Program (CSP)
- Environmental Quality Incentives Program (EQIP)
- Farm and Ranch Lands Protection Program (FRPP)
- Grassland Reserve Program (GRP)
- Wetlands Reserve Program (WRP)
- Wildlife Habitat Incentives Program (WHIP)

NRCS 2008 Farm Bill Programs in New Hampshire

The chart below describes the conservation programs authorized in the 2008 Farm Bill and available through NRCS in New Hampshire. These programs help reduce erosion, protect water quality in streams and rivers, restore and establish wildlife habitat, and improve air quality on our nation's lands. For more information contact your local USDA Service Center (listed on the back page of this pamphlet) or visit us online at www.nh.nrcs.usda.gov.

Program	Description	Who is eligible? What land is eligible?	Length and type of agreement	Financial incentives provided by USDA *	Participant obligations	What's new?
Conservation Technical Assistance (CTA) Conservation Planning	CTA provides conservation planning services to private and public individuals, groups and entities.	Individuals, groups, entities, and units of government who own and/or manage land.	Cooperative agreement with local Conservation District	No payments are provided. Technical assistance is provided free of charge.	Directly participate in the planning process by providing information and developing goals for farm or forest lands.	N/A
Agricultural Management Assistance (AMA)	AMA helps mitigate risk through conservation practices on the farm.	Individuals, groups or entities who own or manage non-irrigated farmland with droughty soils.	2 to 10-year contract	Partial compensation for implementing approved conservation practices. Beginning, limited-resource, and socially disadvantaged farmers may be eligible for higher payment rates.	Install and maintain conservation practices to NRCS standards.	\$50,000 annual payment limitation.
Conservation Stewardship Program (CSP)	CSP rewards farmers who are good conservation stewards of their land and offers compensation for enhancements.	Individuals, groups or entities who own or manage farmland or non-industrial private forestland, not already enrolled in WRP or GRP, with existing conservation practices.	5 year contract with possible renewal	Annual payments for maintaining, and compensation for enhancing, existing conservation practices.	Maintain or increase level of land stewardship.	Enrollment opened to all U.S. areas. Organic producers encouraged to apply. Formerly the Conservation Security Program.
Environmental Quality Incentives Program (EQIP)	EQIP helps promote farm and forest production by enhancing the environmental quality of soil, water, air, plants and animals.	Individuals, groups or entities who own or manage farmland, pasture-land or non-industrial forest land.	2 to 10-year contract	Partial compensation for the cost of implementing conservation practices. Beginning, limited-resource, and socially disadvantaged farmers may be eligible for higher payment rates.	Install and maintain conservation practices to NRCS standards.	Payments are limited to \$300,000 over a 6-year period. Emphasis on forest management, livestock issues, organic farming, cropland, pollinator habitat, air quality, and energy conservation. Payments for forest, wildlife, IPM, CNMP, transition to organic, grazing, and energy plans.
Farm & Ranch Lands Protection Program (FRPP)	FRPP works in partnership with land trusts and local government units to protect agricultural lands through the purchase of development rights.	Individuals, groups or entities with privately owned farmland that has productive soil resources and/or historic significance, and has a pending offer from an eligible entity, such as a land trust.	Permanent easement	NRCS contributes up to 50 percent of the easement purchase based on appraised fair market value.	Maintain or increase level of agricultural land use and/or preserve sites with documented historic significance.	The program's purpose changed from protecting topsoil to protecting agricultural use and historic sites.
Grassland Reserve Program (GRP)	GRP offers compensation for landowners to protect, restore and enhance grasslands. (Apply through the USDA Farm Service Agency for rental agreements and NRCS for permanent easements.)	Individuals, groups or entities who own or control land that historically has been dominated by grassland, forbs or shrubland and a historical use of pasture or hayland management. Publicly owned lands are not eligible.	Permanent easement or 10, 15, or 20-year rental contract	Compensation for the cost of implementing conservation practices. Rental contract: annual payments for the length of the contract Permanent easement property value based on NRCS Geographic Area Rate Cap (GARC), less the grazing value.	Maintain grasslands as agreed. Install and maintain restoration practices to NRCS standards.	\$50,000 annual payment limitation for rental agreements. No minimum acreage requirement. Grazing management plan is required.
Wetlands Reserve Program (WRP)	WRP promotes the protection and restoration of wetlands through the purchase of easements and payments for restoration activities.	Wetlands owned by private individuals, groups or entities, where the functions and values have been degraded by the production of food or fiber sometime in its history. Wetland functions and values must be restorable and suitable for wildlife benefits. Publicly owned lands are not eligible.	Permanent easement or 10-year restoration agreement	One time easement payment based on the lesser of: the appraised fair market value, Geographic Area Rate Cap, or landowner offer. 100% compensation for the cost of wetland restoration with permanent easements. 75% for 10-year restoration agreements.	Maintain or restore wetlands as agreed. If restoration is needed, NRCS pays 100% of the cost for permanent easements; 75% of costs on 10-year restoration agreements. Install and maintain restoration practices to NRCS standards.	\$50,000 annual payment limitation for 10-year restoration agreements.
Wildlife Habitat Incentives Program (WHIP)	WHIP helps improve fish and wildlife habitat and restore natural ecosystems.	Individuals, groups or entities who own or manage farmland or non-industrial forest land. Publicly owned lands are not eligible.	2 to 10-year contract or 15-year critical habitat agreement	Partial compensation for the cost of implementing conservation practices. Payments for the costs of critical habitat agreements. Beginning, limited-resource, and socially disadvantaged farmers may be eligible for higher payment rates.	Improve or restore wildlife habitat as agreed. Install and maintain wildlife practices to NRCS standards.	\$50,000 annual payment limitation. Increased cap on long-term agreements.

* A current list of eligible conservation practices and payment rates will be posted on our website: www.nh.nrcs.usda.gov.

FAQ frequently asked questions

How do I begin working with NRCS?

Contact your local USDA Service Center to speak with one of our conservation professionals. Contact information is on the back page, or visit www.nh.nrcs.usda.gov.

Who is eligible to apply for NRCS Programs?

Eligibility requirements vary slightly depending on the program. Our programs are generally directed towards producers on agricultural and forest lands. There are some exceptions, so please contact your local NRCS office to discuss your situation.

For most NRCS programs, you will need to complete several forms and meet additional eligibility criteria. The following forms are available on our website or by calling an office:

- AD-1026: Highly Erodible Land and Wetland Conservation Certification
- CCC-926: Adjusted Gross Income Certification
- CCC-901: Entity and Joint Operation Membership (for certain applicants)

Are NRCS programs voluntary?

Participation in all NRCS programs is completely voluntary; however, NRCS programs providing financial assistance require compliance with the terms of a contract.

If I enroll my land in an easement program, do I retain ownership?

If you enroll your land under an easement or rental contract, you retain full ownership of the land. Your participation in the program will restrict some uses of the land during the terms of the agreement, but you maintain control of public access.

Glossary

Agricultural land: Cropland, grassland, pasture and other land on which agricultural and forest products or livestock are produced.

Conservation practice: A structural, vegetative or management measure to maintain or improve the condition, productivity, sustainability or usability of targeted resources. Examples include cover crops, nutrient management, manure storage facilities and wildlife habitat improvement.

Contract: A binding agreement for the transfer of financial and technical assistance from NRCS for the installation and maintenance of specific conservation practices as scheduled and agreed to by NRCS and the participant.

Easement: An interest in land defined in a deed, whereby the landowner conveys all development rights and interests while retaining rights of ownership and all reserved rights stated in the easement deed.

Limited-resource farmer: A farmer with limited financial resources. Determine your eligibility at: www.lrftool.sc.gov.usda.gov/tool.asp

Non-industrial forest land: Rural land that has existing tree cover or is suitable for growing trees and is owned by any non-industrial private individual, group, association, corporation, Indian tribe or other private legal entity that has definitive decision-making authority over the land.

Rental contract: A legal document that specifies the obligations and rights of the participant, including annual rental payments to be provided to the participant.

Resource Concern: Problem or opportunity with soil, water, air, plants or animal resources than can be addressed with conservation practices.

Socially disadvantaged or beginner farmer: People who belong to racial or ethnic groups that have historically been subjected to prejudice or a farmer who has been farming fewer than 10 years.
